Introduction

The purpose of this document is to provide hands-on experience with the daily functions of a Time & Labor manager, including tasks such as viewing and editing time cards, resolving exceptions, and managing entries and time events. This guide includes screenshots and step-by-step instructions to help HR perform day-to-day time-related actions, as well as separate sections for line managers and employees. Line managers will be able to view their direct reports' time cards, while employees will be able to view their time attendance, calculated lateness, and violations. Employees will also be able to submit time change requests in cases where a punch is missing or incorrect.

Human Resource Admin - Team Time Cards

A time card is what holds all time related information for an employee. To view an employee time card, follow the below steps.

Steps:

1- Navigate to “My Client Groups”

2- Choose “Team Time Cards”

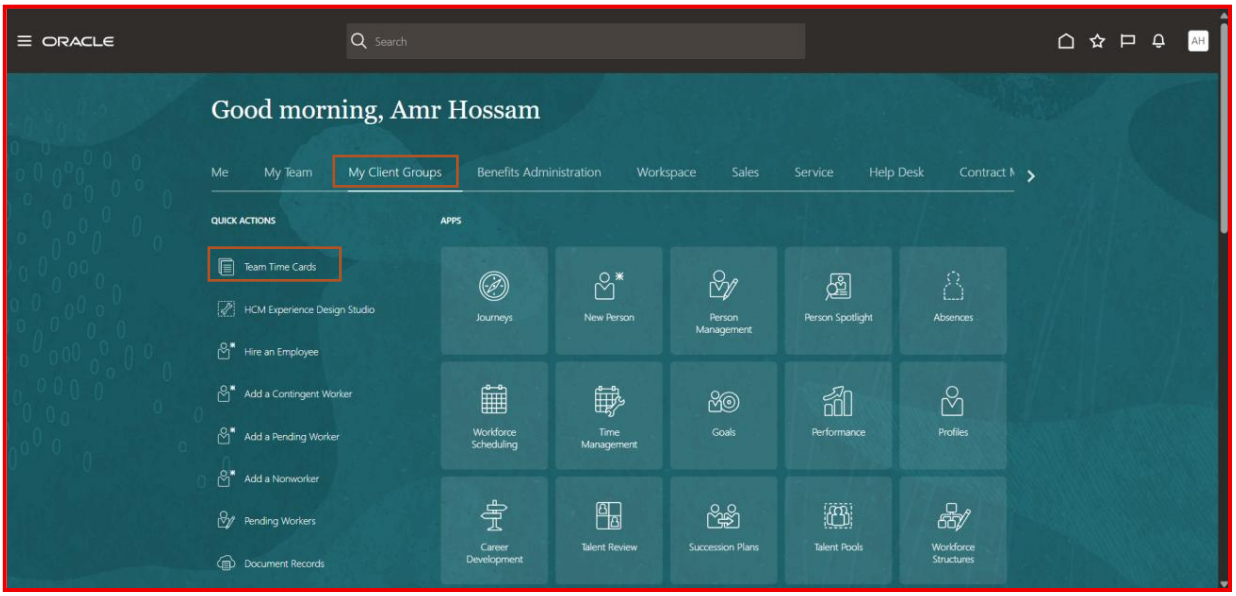
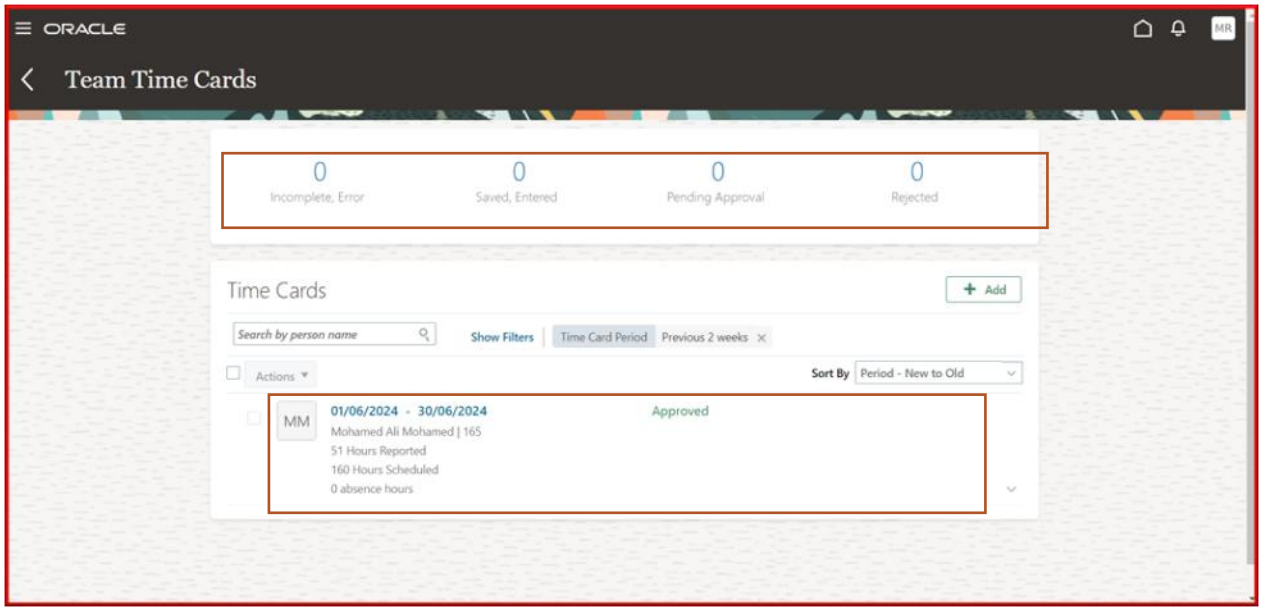
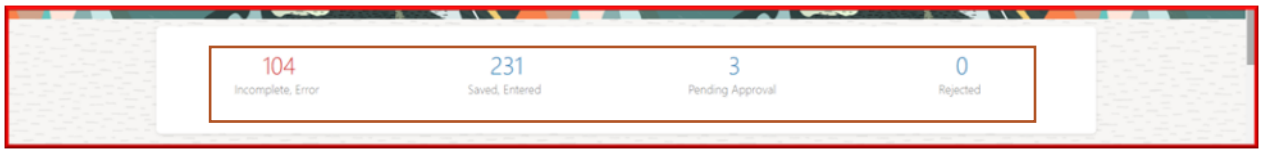
4- Filter between time cards

5- Choose the worker’s time card based on period



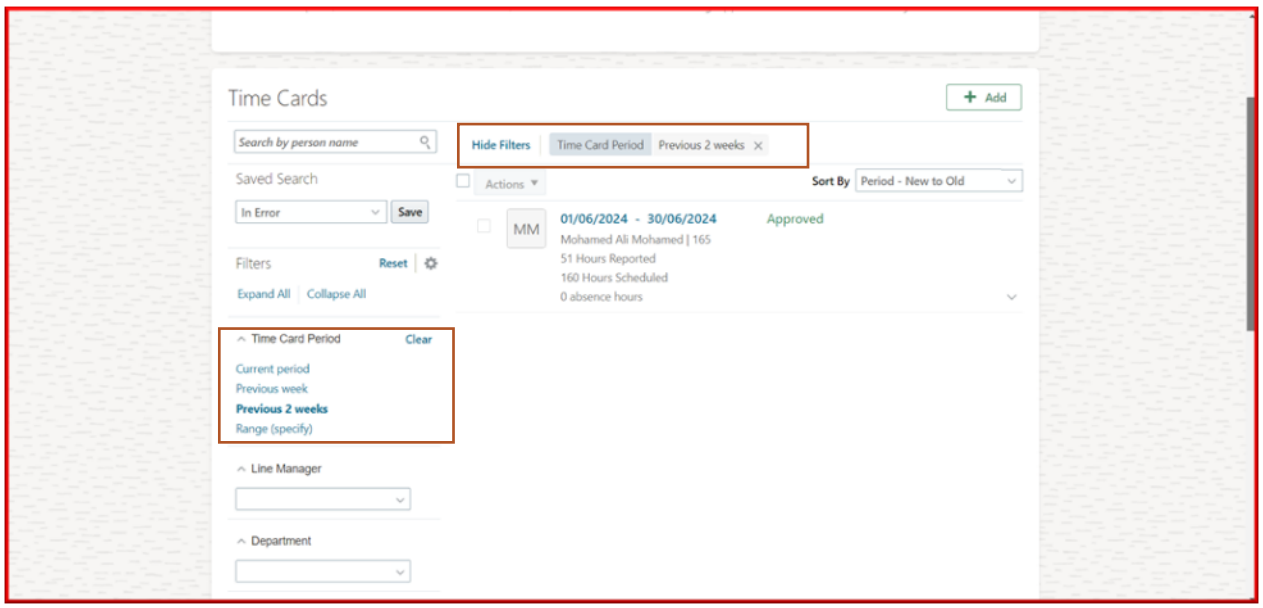




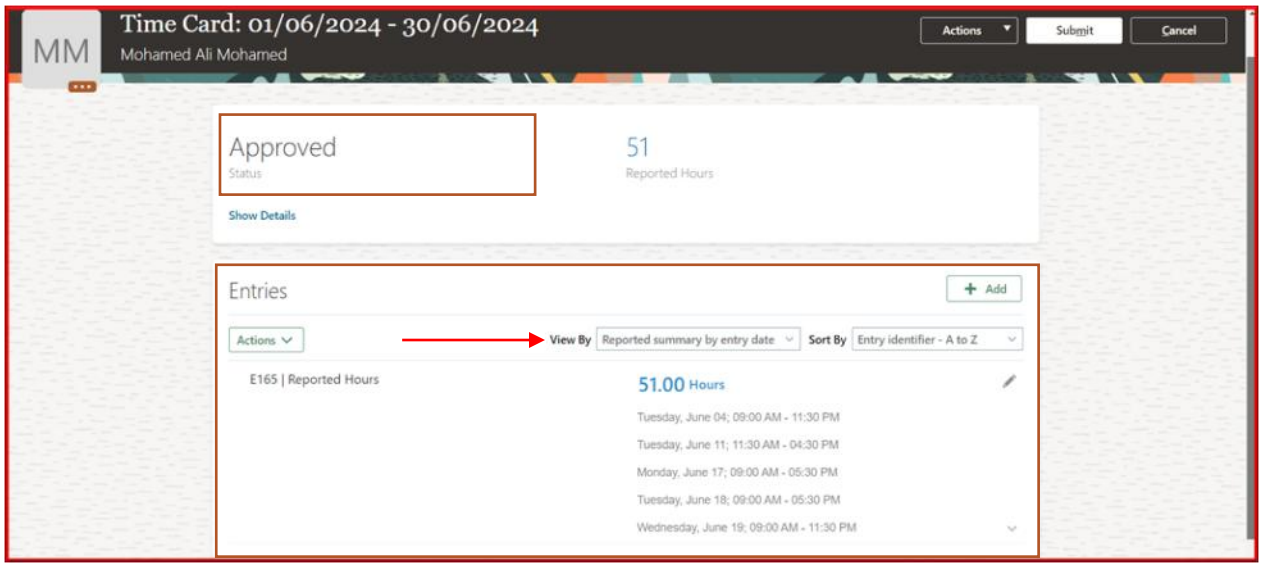
Time Card Statuses:

- **Incomplete:** There's a missing in or out detected in that time card and it is still not resolved yet
- **Saved:** Time entries are entered but not submitted
- **Pending Approval:** Time card submitted for approval
- **Rejected:** Time card submitted but rejected

As shown below, many filters could be applied while searching for a time card to narrow down the search results.



After Choosing an employee time card, it will be displayed as below, showing time card status, and time entries. Reported hours are the entries generated from the time machine.



When choosing to view the calculated details, calculated time elements will show up such as late in/ overtime and any other calculated element in a daily pattern.
